

Verification and Validation for HACCP (Advanced HACCP)

Course Outline

This course is designed to adequately address verification and validation components of HACCP plans and ensure justifications are in place. The course is designed for those who already have worked with HACCP and would like to extend their knowledge to assess and review the scientific and technical content of a HACCP plan to ensure it is effective and complete.

We use the latest CODEX validation and verification guidelines for this course.

Course duration

2 day classroom training

Course content

- HACCP Review (against Codex guidelines)
